## BillFinity

### Do More with NetSuite

**Would you like to take the headache out of managing your ongoing subscription recurring billing?**

BillFinity is an easy-to-use software solution built to automate your recurring subscription management and billing. Fully integrated with NetSuite and easy to implement, it is especially beneficial for organizations that are managing a high volume of transactions.

### Features and Benefits

**Ongoing Subscriptions** automatically creates NetSuite recurring billing subscriptions from sales activity and allows for easy ongoing updates/adjustments for go forward billing without requiring any other contract modifications

**Smart Logic Billing Frequencies** allows for easy definition of any billing frequency, including monthly, quarterly, annually, or custom

**Revenue Recognition** takes full advantage of NetSuite's Advanced Revenue Management (ARM) feature and can also support Amortization Schedules and

**Renewal Transactions** allows definition of the default type of renewal transaction to create at billing along with the ability to generate these transactions at any specified number of days in advance of renewal

**Credit Card Compliant** if credit card information is stored on the standard NetSuite customer record (fully PCI compliant), automatically creates payment records and applies to the invoices created as part of the renewal process

**Uplift Management** supports basic automated uplift management and **Usage Billing**

**Subscription Metrics** provides full MRR/ARR reporting and **No Hidden Transaction Fees**

Pricing: **Standard** - \$3,800 annual subscription + \$2,400 one-time setup fee | **Premium** - \$6,600 annual subscription + \$3,600 one-time setup fee | **Enterprise** - \$9,800 annual subscription + \$5,200 one-time setup fee
